

# CODELCO VP EL TENIENTE II WATER FACILITIES

**PLANT TYPE**  
Wastewater treatment and drinking water treatment plants

**CLIENT**  
CODELCO

**SECTOR**  
Industrial

**COUNTRY**  
Chile

**CAPACITY**  
Wastewater 19,200 m<sup>3</sup>/month  
Drinking water 24,000 m<sup>3</sup>/month

**YEAR COMMISSIONED**  
2007

**TYPE OF PROJECT**  
Services

**STATUS**  
In operation

Almar Water Services Latam develops a critical function for the operational continuity of Codelco El Teniente Division through the provision of a specialized service for the operation and maintenance of drinking water treatment plants, sewage, and the operation and maintenance of boiler systems for heating and hot water for the change rooms. These facilities serve more than 500 people per shift; if the services provided by Almar Water Services Latam needed adequate reliability, the personnel would not have the minimum hygiene conditions and, therefore, could not perform their construction activities.
