Surface water catchment and deep wells

CLIENT
CODELCO

SECTOR
Industrial

COUNTRY
Chile

CAPACITY
80,000 m³/month

YEAR COMMISSIONED
2019

TYPE OF PROJECT
Services

STATUS
In operation

Almar Water Services Latam carries out the operation and maintenance of 33 deep wells, with an average depth of 150 meters, and also develops activities for the collection of water inside the pit with drains, channeling systems with capping and drainage, and subsequent impulsion of surface water to the surface for its use for Codelco Ministro Hales Division.

The monthly water recovered is equivalent to 23 Olympic swimming pools, corresponding to about 78 thousand cubic meters; all the water is used for copper ore processing and for irrigation of roads to control particulate matter.
